DIMENSIONI - DIMENSIONS

Caratteristiche tecniche - Technical features

Il tavolino 120 realizzato in robusto materiale termoplastico adatto all'uso sui veicoli classificati a 4 stelle dove viene richiesta una sicurezza al collasso pari a 12 kg. Sono inoltre possibili svariate angolazioni da 0° a 25° gradi.

Varie possibilità di combinazione delle cerniere permettono l'applicazione su tutti i tipi di retroschienale.

Table type 120 is produced in a strong thermo-plastic material. This type of table is suitable for category class 4 vehicles, where, for security reasons, the collapsible load is equal to a weight of 12 kg.

Inclinations from 0° to 25°.
Several versions of hinges are available in order to be able to fit the table to different seat back configurations.

- A - Da riposo a utilizzo.
- From rest to working position.
- B - Collassamento per sicurezza.
- Safety collapse.
- C - Ritorno.
- Return.

L'insieme dei componenti montati ad anello, garantiscono l'antisvitamento degli organi di fissaggio, senza successiva manutenzione e creano un nuovo disco copri ruota ad anello, sia per ruote anteriori sia posteriori.

The Nut Lock single components assembled together create a new ring wheel cover, that prevents the unscrewing of the fixing elements. No further maintenance is needed!
Nut Lock can be mounted either on front or rear wheels.

SAFETY
Unscrewing prevention

PROTECTION
Wheel fixing element protection

AESTETIC
Ring wheel cover with a brand-new design

CARACTERISTICS
Body: black or chromed
Cap: pantone 369U

CUSTOMISATION
Nut-Lock's cap can be tailored with an embossed logo

LIGHTNESS
It weighs only 50 g!

KEYS
30 - 32 - 33
9.5" , 22.5" wheel rims

MAINTENANCE
No further maintenance needed

Front wheel

Rear wheel

- I dadi delle ruote non devono essere danneggiati da nessun segno di ammaccature o abrasioni
- La distanza tra il mozzo della ruota o perni di centraggio e il collare dei dadi non deve essere inferiore a 3 mm
- Non devono esserci valvole o rilevatori di monitoraggio della pressione dei pneumatici (TPMS) nell'area di fissaggio dei bulloni.
- The wheel nuts shall not be damaged (no dents nor abrasions signs)
- The distance between the wheel hub (or centering pins, if present) and the nuts' collar shall not be less than 3 mm
- There must be no valves stems or tire-pressure monitoring detectors (TPMS) in the bolt fixing area where the lug holes are
